THE SAFE AND DRY SOLUTION TO STORAGE HUMIDITY PROBLEMS

Huge costs are incurred each year through the harmful effects of humidity. Storage rooms, archives, libraries, classic and sports cars, museums and galleries can be safely protected by simply installing a dehumidifier.

The dehumidifier greatly reduces the effect of excessive humidity, for example, unwanted condensation on cold surfaces, the corrosive effect of rust, dry rot and mould growth.

Simple to operate and easy to install, a dehumidifier can be of great benefit in controlling humidity and reducing the damage it may cause.

EFFICIENT AND EASY TO INSTALL

Storerooms

Classic car storage

Museums

Libraries

Galleries

EUROPE'S LARGEST DEHUMIDIFIER MANUFACTURER

Ebac was founded in 1974 and specialises in dehumidifiers, air conditioning and water coolers. We are a privately owned company, with our main manufacturing base in the UK with our products being sold in 20 countries throughout the world.

WAREHOUSING

WILL CONDENSATION DAMPEN YOUR SPIRITS?

Warehouses, like garages, are meant to protect their contents. But, just like garages, they can cause damage to their contents if condensation is not overcome through effective temperature or humidity control.

If you're thinking of using a warehouse, make sure it offers the protection you need.

And if you own a warehouse, make sure you're not letting your customers down.

A CHOICE OF MODELS FOR TOTAL PROTECTION

From our extensive range of dehumidifiers we've selected five models that are ideal for a variety of applications. Whichever you choose, you'll get the same key benefits, allowing you to:

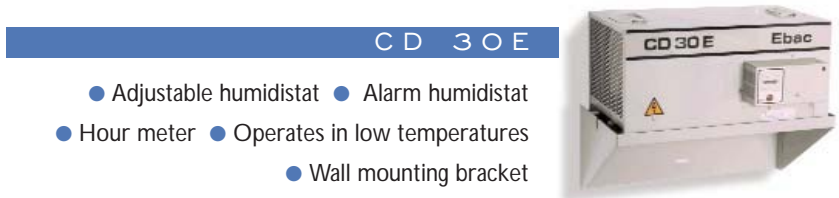

- Maintain and control humidity
- Cure condensation
- Prevent corrosion
- Alleviate mould growth
- Reduce building and maintenance costs.

All five are British made and highly energy efficient, with economical running costs.

CD 30

- Robust construction
- Variable humidistat

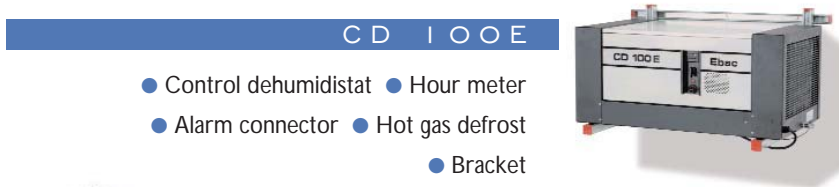

CD 30E

- Adjustable humidistat
- Alarm humidistat
- Hour meter
- Operates in low temperatures
- Wall mounting bracket

CD 100

- Adjustable humidistat
- Hot gas defrost
- Robust construction

CD 100E

- Control dehumidistat
- Hour meter
- Alarm connector
- Hot gas defrost
- Bracket

D 850

- Sleek design
- Two washable filters
- Two-speed motor
